

General description

Heavy duty self vulcanising duct sealing tapes made of an elastomeric modified butyl rubber adhesive.

Provides a strong and excellent airtight seal on metal ducts.

The bond grows stronger with time.

Technical specification

	PBT
	Polyethylene foil facing
Width	50, 75 and 100 mm
Length	15 m
Thickness	0,6 mm / 0,8 mm
Backing	Polyethylene 0,03 mm
Tack	Immediately
Bonding time	Maximum 24h
Tensile strength	23 N / mm²
Adhesion	3,6 Kg / cm
Elongation at break	165 %
Service temperature	- 20°C / + 70°C
Application temperature	+ 5°C / + 35°C
Flammability	DIN4102 kl1 B2
Solids	100 %
Use	Inside
Color	Light grey

Application

- · Surfaces should be clean and dry, free of dust, grease, oil and any other loose matter.
- When applying, cut an excess of 10 cm tape to allow overlapping. Remove the release paper.
- · Make an overlap over the seam.
- · The tape should be pressed down firmly.

Storage

The product can be storred for 2 years in dry and closed packing between +5°C and +30°C.
